KRUUSE Dental Instruments

KRUUSE Dental Instruments

We want to offer our customers the best possible dental instruments. We have carefully chosen our main supplier of dental hand instruments - a supplier who not only meets our high standards by producing top class dental instruments, but also lives up to our Code of Conduct, which applies to Quality/Environment/Occupational Health and Safety e.g labour. Our supplier is ISO- and CE certified.

Our chosen manufacturer has produced first class superior quality instruments for more than 100 years. With their focus on innovation and quality, it is possible to manufacture any kind of instrument, that will enable our customers to provide the best care for their patients. Using the correct equipment is essential for good dental work. The quality and combination of steel used must be correct for the various types of instruments. Also, it is important that the instruments are strong and durable.

Besides **sharpness** and **durability**, we also have focus on **design** and **ergonomics**. We have chosen an exclusive design and a 10 mm thickness of the round handles, to avoid finger fatigue, which could happen, if the instrument handles are too thin. Our luxators and elevators are of course available with both standard and short (stubby) handles to suit hands of all sizes.

We have a 5-year warranty on all our dental hand instruments.

KRUUSE mouth gag for dog, size 2	270977
KRUUSE mouth gag for dog, size 3	270978
KRUUSE mouth gag for dog, size 4	270979

BUSTER Mouth Wedge

Cat. No

Mouth prop for dogs and cats. Radiolucent. Anatomically designed to provide secure open-mouth position. Ideal for anaesthesia, radiography, oral surgery and dentistry. No moving parts. Also useful if canine teeth are absent. Easy to clean.

BUSTER mouth wedge, S	270955
BUSTER mouth wedge, L	270956

KRUUSE Lip Retractor with Soft Coated Jaws

Cat. No

Keeps the lip away during dental procedures. Designed with soft jaws and interlocking teeth, but it is not possible to close the jaws completely, otherwise, it would harm the lip.

KRUUSE lip retractor with soft coated jaws	282417
--	--------

KRUUSE Minnesota Retractor

Cat. No

A multi purpose retractor. Used to retract and protect the tissue and the user when working with a drill. Each end also has a specific function: One holds back the cheek, while the other holds down the tongue.

KRUUSE Minnesota retractor	282385
----------------------------	--------

KRUUSE Dental Mirror

Cat. No

The dental double ended mirror is essential in the oral examination. It enables the practitioner to examine poorly visible areas of the teeth and the oral cavity. This Fahrenkrug model has a large and a small mirror.

KRUUSE dental mirror, model Fahrenkrug, dual ended

282402

KRUUSE Explorer and Measuring Probe

Cat. No

The tip of the probe is blunt and perfect for periodontal probing in cats or dogs. Engraved periodontal markings 1, 2, 3, 5, 7, 8, 9, 10 mm, in order to avoid fading ink as a result of autoclaving. The Shepherd hook at the other end is useful for identifying and exploring supra- and subgingival tooth defects.

C KRUUSE explorer and measuring probe, **extra long** 17 mm

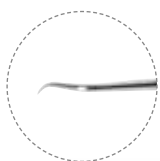

282407

C KRUUSE explorer and measuring probe, 10 mm

282380

F KRUUSE explorer and measuring probe, fine, cats/small dogs, 10 mm

282395

KRUUSE Resorptive Lesion Probe

Cat. No

A probe for detecting resorptive lesions or residual calculus subgingivally. This instrument is also suitable for identifying bone loss accompanying periodontitis.

KRUUSE resorptive lesion probe

282397

Scalers

KRUUSE offers a wide variety of scalers for all indications and to match all individual preferences. All of our scalers are designed for moderate to heavy deposits of plaque and calculus removal.

KRUUSE Sickle Scaler, Curved

Cat. No

The KRUUSE sickle scaler with curved blade has two cutting edges that end in a sharp point. For removal of calculus between teeth and above the gum.

- | | | |
|----------|---|--------|
| C | KRUUSE Sickle scaler, curved | 282382 |
| F | KRUUSE Sickle scaler, curved, fine, cats/small dogs | 282398 |

KRUUSE Jaquette Scaler

Cat. No

The KRUUSE Jaquette scaler has a straight blade and two cutting edges that end in a sharp point. The shape makes it useful for broad facial and lingual surfaces as well as interproximal scaling.

- | | |
|---|--------|
| KRUUSE Jaquette scaler, straight blade, supragingival | 282383 |
|---|--------|

KRUUSE Kaplan Scalers

Cat. No

The Kaplan scaler is sharply angled for supragingival scaling.

- | | |
|--|--------|
| KRUUSE Kaplan scaler, dual ended, for large patients like dogs | 282401 |
|--|--------|

KRUUSE Tooth Scaler

Cat. No

These single ended scalers have a blunt end for scraping.

- | | |
|----------------------------|--------|
| KRUUSE tooth scaler, right | 282403 |
| KRUUSE tooth scaler, left | 282404 |

KRUUSE McCall Scaler

Cat. No

Supragingival scaler used for premolars, molars, mesial/distal.

- | | |
|----------------------------------|--------|
| KRUUSE McCall scaler, dual ended | 282406 |
|----------------------------------|--------|

Scaling and Extraction

KRUUSE Curette

Cat. No

The KRUUSE Curette is used for cleaning and removal of debris and calculus from the bottom of the sulcus to above the gum, giving the gingival tissue a chance to recover.

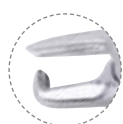

KRUUSE standard Jaquette curette 31/32, subgingival

282384

F KRUUSE Gracey curette 13/14, subgingival, fine, cats/small dogs

282399

KRUUSE Tartar Removing Forceps

Cat. No

KRUUSE Tartar removing forceps for heavy calculus on the tooth surface. When used prior to ultrasonic scaling, it is possible to reduce scaling time. The special shape of the jaw minimizes the risk of tooth fracture.

KRUUSE tartar removing forceps

282386

KRUUSE Periosteal Elevator Double Ended

Cat. No

Periosteal elevators are used for reflecting and retracting the gum flap after initial incision of the gingival tissue. The instrument has thin sharp blades.

These KRUUSE elevators have rounded edges at both ends.

C KRUUSE periosteal elevator double ended

282381

F KRUUSE periosteal elevator, double ended, fine, cats/small dogs

282396

KRUUSE Periosteal Elevator, Molt, No 9

Cat. No

This periosteal elevator has rounded edges which help diminish the risk of damaging the tissue when lifting the gum flap. The sharp end facilitates elevation of the flap.

KRUUSE periosteal elevator, Molt, No 9

282390

KRUUSE Periosteal Elevator, Rougine, double ended, Nordberg

Cat. No

This double ended elevator is ideal for lifting the gum flap around dog's/cat's teeth. Model Nordberg.

KRUUSE periosteal elevator, Rougine, double ended, Nordberg

282405

KRUUSE Periosteal Elevator, Standard Handle

Cat. No

A single ended periosteal elevator is an important instrument when removing canines. The standard handle allows a different grip compared with the double ended elevator, and is used for lifting the gum flap in order to avoid soft tissue from being encountered with a burr when removing bone.

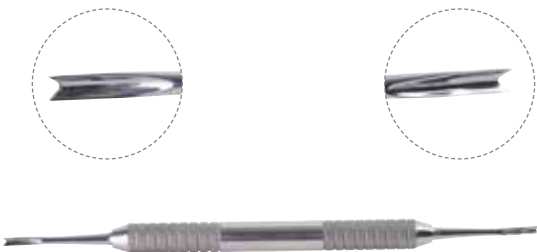

KRUUSE periosteal elevator, standard handle

282355

Deciduous Elevators, Curved

Our curved deciduous elevators are made specifically for extraction of deciduous teeth - which can be a very demanding procedure. The three different sizes of deciduous elevators cover the large variety of deciduous teeth. The periodontal ligament is cut by the sharp elevator end, while the elevator tip follows the mesial and the distal curve of the root respectively. The elevators can also be used for rabbit and rodent incisors.

KRUUSE Curved Deciduous Elevators

Cat. No

KRUUSE curved deciduous elevator, S

Extraction

Single Ended, Round Elevators

Every vet working with dentistry has a favourite shape of the handles of elevators and luxators. The most important considerations are a good ergonomic fit to secure a firm grip and the sharpness of the tip. When choosing the KRUUSE pear shaped handle, you get a perfect fit in the palm of your hand as well as a choice between two handle lengths. This will allow you to gain complete control of the tip of the instrument and you will get a good experience of holding the optimal tooth extraction instrument in your hand.

KRUUSE Elevator, Winged, Standard Handle		Cat. No
The KRUUSE winged elevator provides you with a very sharp blade and the lateral wings match the shape of the tooth. This combination will help stretch and cut the periodontal ligaments.		
KRUUSE elevator, winged, 1 mm, standard handle		282330
KRUUSE elevator, winged, 2 mm, standard handle		282331
KRUUSE elevator, winged, 3 mm, standard handle		282332
KRUUSE elevator, winged, 4 mm, standard handle		282333
KRUUSE elevator, winged, 5 mm, standard handle		282334
KRUUSE elevator, winged, 6 mm, standard handle		282335

Sharpening Stone		Cat. No
With a flat surface, this dental sharpening stone can be used for sharpening most dental hand instruments including curettes, elevators and scalers. In order for the instruments to maintain optimal function, they should be kept sharp at all times. For best results, sharpen the instruments after use. The stone can be used in dry condition or together with water or oil.		
KRUUSE sharpening stone, L, 15 x 5 x 2.5 cm		282419

See more sharpening stones at page 25

KRUUSE Elevator, Winged, Stubby Handle

Cat. No

KRUUSE elevator, winged, 1 mm, stubby handle	282336
KRUUSE elevator, winged, 2 mm, stubby handle	282337
KRUUSE elevator, winged, 3 mm, stubby handle	282338
KRUUSE elevator, winged, 4 mm, stubby handle	282339
KRUUSE elevator, winged, 5 mm, stubby handle	282340
KRUUSE elevator, winged, 6 mm, stubby handle	282341

KRUUSE Elevator Set, Winged, 1-6 mm, Stubby Handle, in Stainless Steel Case

Cat. No

KRUUSE elevator set, winged, 1-6 mm, stubby handle, in stainless steel case	282356
---	--------

KRUUSE Elevator, Straight Tip, Stubby Handle

Cat. No

This elevator has the same function as a regular dental elevator, but is thin and narrow and has a longer blade to facilitate removal of roots or bone fragments.	
KRUUSE elevator, straight tip, 1 mm, stubby handle	282347
KRUUSE elevator, straight tip, 2 mm, stubby handle	282348

Choosing the right size handle
- a standard or a stubby (short) handle?

It is a great advantage to have two different sizes of handles to choose between, when selecting your luxators/elevators. It is important to have full control over the instrument, otherwise it can slip and hurt the patient. If you can put the blunt end of the handle in your palm and almost reach the tip of the instrument with your index finger, then the dental instrument is the right size for your hand.

KRUUSE Luxator, Stubby Handle

Cat. No

Luxators are used to stretch and separate the periodontal ligament and to force a wedge between the root of the tooth and the surrounding bone, which helps to loosen the tooth in the socket. Our luxators are straight and extremely sharp and should not be used to lift the tooth like an elevator. Often it is sufficient to use the luxators and then remove the tooth with an extraction forceps afterwards.

KRUUSE luxator, 1 mm, stubby handle	282342
KRUUSE luxator, 2 mm, stubby handle	282343
KRUUSE luxator, 3 mm, stubby handle	282344
KRUUSE luxator, 4 mm, stubby handle	282345
KRUUSE luxator, 5 mm, stubby handle	282346

KRUUSE Straight Root Tip Pick, Standard Handle

Cat. No

Very useful instrument for extraction of cat teeth and broken root tips. This instrument is very sharp, and care is required when using it.

KRUUSE straight root tip pick, standard handle	282354
--	--------

KRUUSE Extraction Forceps Cat. No

Extraction forceps are used to grip the tooth after the roots of the tooth are loosened with a luxator/elevator. KRUUSE has a wide range of extraction forceps to cover all veterinary requirements. The design decreases the risk of cracking the tooth. Both the spring and the small size of the handle help to prevent use of excessive force. This gives better control of the extraction.

- C KRUUSE extraction forceps 282387
- F KRUUSE extraction forceps, fine, cats/small dogs 282400

It is advisable to oil the connection screw of the forceps for better spring function.

KRUUSE Extraction Forceps, Right Angled Cat. No

The jaws are right angled (90°) in order to reach "difficult" teeth and teeth at the back of the oral cavity.

- KRUUSE extraction forceps, right angled 282394

It is advisable to oil the connection screw of the forceps for better spring function.

KRUUSE Root Tip Extraction Forceps Cat. No

This extraction forceps can be used to locate and extract fragments of broken teeth.

- KRUUSE root tip extraction forceps 282388

It is advisable to oil the connection screw of the forceps for better spring function.

KRUUSE Fragment Extraction Forceps Cat. No

Perfect for small delicate teeth and broken root fragments.

- KRUUSE fragment extraction forceps 282389

It is advisable to oil the connection screw of the forceps for better spring function.

Rabbits and Rodents

Rabbits and Rodents

Working with rabbits and rodents demands special hand instruments. KRUUSE has a developed range, which covers many of the procedures in this growing field of veterinary dentistry.

KRUUSE Incisor Luxator

Cat. No

When extracting rabbit incisors, this instrument is a useful aid to loosen and break down the periodontal ligaments on the medial and distal side of the incisor teeth.

KRUUSE incisor luxator

282300

KRUUSE Molar Luxator

Cat. No

An instrument for separating the periodontal ligaments on all sides of the premolar and molar teeth, when extracting rabbit cheek teeth.

KRUUSE molar luxator

282301

KRUUSE Spatula

Cat. No

This spatula is the perfect aid for repositioning the cheeks and tongue when examining the oral cavity and teeth.

KRUUSE spatula

282302

KRUUSE Cheek Dilators		Cat. No
When working in the oral cavity of rodents, it is important to have as much visibility and space as possible. A cheek dilator expands the cheeks and provides good working space.		
KRUUSE cheek dilator, S		282307
KRUUSE cheek dilator, M		282308
KRUUSE cheek dilator, L		282309

KRUUSE Cheek Dilator, Curved		Cat. No
The curved shape of these dilators gives an even better view and access back in the oral cavity as the cheeks are being pushed away from the molar teeth.		
KRUUSE cheek dilator, curved, medium, 2.2 cm		282312
KRUUSE cheek dilator, curved, long, 4.1 cm		282310
KRUUSE cheek dilator, curved, x-long, 6.0 cm		282311

KRUUSE Mouth Gag		Cat. No
An alternative mouth gag is suitable for chinchillas, guinea pigs and small rabbits, when examining the oral cavity. Be aware that this mouth gag has a spring action, and it is important to take the anatomy and size of the mouth of small rodents into account when using it.		
KRUUSE rodent mouth gag, wire		282314

KRUUSE Rodent Mouth Gag		Cat. No
A mouth gag with screw thread separates the upper and lower jaw of the patient. The more you twist the handle, the more you open the mouth. Useful when working with rabbits.		
KRUUSE rodent mouth gag		282315

KRUUSE Table Top Mouth Gag

Cat. No

The popular table top rabbit and rodent mouth gag with a base of teflon, which helps keep the patient warm during the dental procedure. To be cleaned - and autoclaved.

KRUUSE table top mouth gag

282318

KRUUSE Molar Cutter

Cat. No

It is possible to use the KRUUSE molar cutter as the first step when trimming overly long cheek teeth. Be very careful not to make cracks and fractures in the remaining tooth and avoid injuries to the gums and soft tissue. Use of the molar cutter before trimming the tooth further with the burr decreases working time and reduces the risk of overheating the tooth.

KRUUSE rabbit molar cutter, 14 cm

282320

KRUUSE rabbit molar cutter, 17 cm

282316

KRUUSE Rabbit Molar Teeth Extraction Forceps

Cat. No

This instrument is slim and the jaws angled at 100° to facilitate removal of premolars and molars in rabbits.

KRUUSE rabbit molar teeth extraction forceps

282317

Leporidae Skull Model

Cat. No

Besides observation of the patterns of teeth and roots of a characteristic rabbit, the Leporidae skull model comes in handy when involving your clients in the treatment and helps you to explain why and where to make a certain procedure. The double sided education card which comes along with the skull model displays teeth location, name and numbers and location of the nasolacrimal duct.

Model size 9 cm x 4.5 cm x 5.5 cm

Card size 16.5 cm x 13 cm

Leporidae skull model

271247

KRUUSE Rabbit and Rodent Tooth Rasps		Cat. No
Our rasps are regular with two widths, narrow and broad.		
KRUUSE rodent tooth rasp, narrow		282303
KRUUSE rodent tooth rasp, broad		282304

KRUUSE Rabbit and Rodents Burrs		Cat. No
Working with the dental unit and rabbits and rodent teeth demands extra-long burrs and specific tooling for reducing and leveling molar and incisor teeth. All of the equipment works with 1:1 straight nose cone (282464) and micromotor		
Burr, conical, HP, 44.5 mm, 1/pk		282545
Burr, tubular, HP, 44.5 mm, 1/pk		282546
Diamond disc cutter, coated on both sides		282541
Safety shield for diamond discs		282542
To be used along with the diamond disc 282541		
Soft tissue protector		282543
Burr, diamond, HP, 44.5 mm, 1/pk		282544

KRUUSE Rabbit and Rodent Set, 8 Pieces

Cat. No

8 piece complete set of rodent dental instrument to perform oral examination and treatment.

The set consists of:

- 282300 KRUUSE Incisor Luxator
- 282301 KRUUSE Molar Luxator
- 282302 KRUUSE Spatula
- 282307 KRUUSE Cheek Dilator, S
- 282308 KRUUSE Cheek Dilator, M
- 282310 KRUUSE Cheek Dilator, curved, long
- 282315 KRUUSE Rodent Mouth Gag
- 282317 KRUUSE Rabbit Molar Teeth Extraction Forceps.

KRUUSE rabbit and rodent set, 8 pieces

282319

*Each instrument can be
purchased individually*

Instrument Sets

Instrument Sets

Different dental procedures require various assortments of instruments. In KRUUSE we have the most common instruments in sets.

The sets are sold in nice boxes. It is advisable to sterilize and store the instruments in a clean environment before and in between use.

Each instrument can be purchased individually.

Each instrument can be purchased individually

KRUUSE Instrument Set, 14 Pieces, Stubby Handle

Cat. No

Our 14 pieces set is composed of basic instruments used from initial examination and scaling to extraction.

The set consist of:

- 282336 - 282340 KRUUSE Elevator, winged, 1 - 5 mm, stubby handle
- 282354 KRUUSE Straight Root Tip pick, standard handle
- 282386 KRUUSE Tartar Removing Forceps
- 282387 KRUUSE Extraction Forceps
- 282385 KRUUSE Minnesota Retractor
- 282384 KRUUSE Curette, subgingival
- 282383 KRUUSE Jaquette Scaler, supragingival
- 282382 KRUUSE Sickle Scaler
- 282380 KRUUSE Explorer and Measuring Probe
- 282381 KRUUSE Periosteal Elevator Double Ended

KRUUSE instrument set, 14 pieces, stubby handle

282358

Each instrument can be purchased individually

KRUUSE Instrument Set, 5 Pieces, for Deciduous Teeth

Cat. No

The deciduous teeth set is complimentary to a regular extraction set and consists of instruments for extracting deciduous teeth. Can also be used for rabbits and large rodents.

The set consist of:

- 282391 - 292393 KRUUSE Curved Deciduous Elevator, S, M, L
- 282394 KRUUSE Extraction Forceps, right angled
- 282390 KRUUSE Periosteal Elevator, Molt, No 9

KRUUSE instrument set, 5 pieces, for deciduous teeth

282359

Each instrument can be purchased individually

KRUUSE Feline Instrument Set (cats/small dogs), 8 Pieces

Cat. No

The feline set is special designed for cats and small dogs. The combination enables the practitioner to conduct a full oral examination (including uncovering of feline resorptive lesions), and perform cleaning of all tooth surfaces - supra and subgingivally and tooth extraction.

The set consists of:

- 282347 - 282348 KRUUSE Elevator, straight tip, 1 + 2 mm, stubby handle
- 282395 KRUUSE Explorer and Measuring Probe, fine, cats/small dogs
- 282400 KRUUSE Extraction Forceps, small, cats/small dogs
- 282396 KRUUSE Periosteal Elevator, Double Ended, fine, cats/small dogs
- 282397 KRUUSE Resorptive Lesion Probe
- 282398 KRUUSE Sickle Scaler, fine, cats/small dogs
- 282399 KRUUSE Curette, fine, cats/small dogs

KRUUSE feline instrument set (cats/small dogs), 8 pieces

282366

Each instrument can be purchased individually

KRUUSE Elevator Set, Winged, 1-4 mm, Standard Handle Cat. No

Small basic set of elevators with standard handles.

The set consist of :

- 282330 KRUUSE Elevator, winged, 1 mm, standard handle
- 282331 KRUUSE Elevator, winged, 2 mm, standard handle
- 282332 KRUUSE Elevator, winged, 3 mm, standard handle
- 282333 KRUUSE Elevator, winged, 4 mm, standard handle

KRUUSE elevator set, winged, 1-4 mm, standard handle 282360

Each instrument can be purchased individually

KRUUSE Elevator Set, Winged, 1-6 mm, Stubby Handle Cat. No

Complete set of elevators with stubby handles.

The set consist of:

- 282336 KRUUSE Elevator, winged, 1 mm, stubby handle
- 282337 KRUUSE Elevator, winged, 2 mm, stubby handle
- 282338 KRUUSE Elevator, winged, 3 mm, stubby handle
- 282339 KRUUSE Elevator, winged, 4 mm, stubby handle
- 282340 KRUUSE Elevator, winged, 5 mm, stubby handle
- 282341 KRUUSE Elevator, winged, 6 mm, stubby handle

KRUUSE elevator set, winged, 1-6 mm, stubby handle 282363

Each instrument can be purchased individually

KRUUSE Luxator Set, 1-5 mm, Stubby Handle Cat. No

Entire set of all sizes of KRUUSE luxators with stubby handles.

The set consist of:

- 282342 KRUUSE Luxator, 1 mm, stubby handle
- 282343 KRUUSE Luxator, 2 mm, stubby handle
- 282344 KRUUSE Luxator, 3 mm, stubby handle
- 282345 KRUUSE Luxator, 4 mm, stubby handle
- 282346 KRUUSE Luxator, 5 mm, stubby handle

KRUUSE luxator set, 1-5 mm, stubby handle 282364

Each instrument can be purchased individually

KRUUSE Elevator Set, Winged, 1-6 mm, Stubby Handle, in Stainless Steel Case Cat. No

A stainless steel box for sterilization is included with this elevator set.

The set contains:

- 282336 KRUUSE Elevator, winged, 1 mm, stubby handle
- 282337 KRUUSE Elevator, winged, 2 mm, stubby handle
- 282338 KRUUSE Elevator, winged, 3 mm, stubby handle
- 282339 KRUUSE Elevator, winged, 4 mm, stubby handle
- 282340 KRUUSE Elevator, winged, 5 mm, stubby handle
- 282341 KRUUSE Elevator, winged, 6 mm, stubby handle

KRUUSE elevator set, winged, 1-6 mm, stubby handle, in SS case 282356

KRUUSE instrument case stainless steel, 16.5 x 14 x 3.7 cm 282369

Each instrument can be purchased individually

KRUUSE Extraction Set, Winged Elevators with Stubby Handles, 12 pieces in Stainless Steel Case

Cat. No

A general set for tooth extraction with regular instruments.
For fine feline instruments see 282366.

The set consists of:
282336 – 282341 KRUUSE Elevator winged, 1 – 6 mm, stubby handle
282381 KRUUSE Periosteal Elevator double ended
282387 KRUUSE Extraction Forceps
282408 KRUUSE Needle Holder, Neivert
282349 KRUUSE Tissue Forceps, Adson Brown
282409 KRUUSE Scissor, Le Grange, serated
282350 KRUUSE Scalpel blade handle, No 3

KRUUSE extraction set, winged elevators with stubby handles, 12 pieces in SS case 282365

KRUUSE Canine Jaw Model

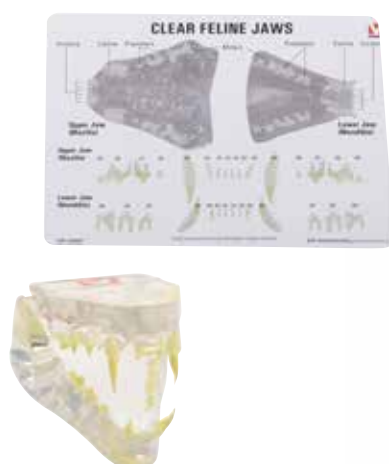

Cat. No

Besides observation of the structure of teeth and roots of a characteristic canine and feline jaw, these affordable clear dental jaw models also come in handy when involving your clients in the treatment, and help you to explain why and where to make a certain procedure. The plastic education card which comes along with the skull model displays teeth location, name and number of each tooth for identification. This eases the identification of how to attack the problem and how to precisely section and excise teeth.

Model size 12 x 7 x 5 cm
Card size 16.5 x 13 cm

KRUUSE canine jaw model

271426

KRUUSE Feline Jaw Model

What is

KRUUSE Build-to-fit

Flexible concept - Build **your** solution

You know best what you want in your clinic. This is the thinking behind KRUUSE Build-to-fit. We deliver the flexibility so you can pick-and-choose between unit size, functions and last but not least: COLOUR. Use our Build-to-fit ordering chart and immediately see YOUR configuration and price. KRUUSE Dental Solution is quality and thought-through design and it is also flexibility, that gives you the right solution for your needs and makes upgrades/downgrades easier and more affordable.

Warranty:

We have started co-operating with well-established manufacturers in Canada and Denmark. We offer a 5-year warranty on our units and a 1-year warranty on our handpieces.

Technical support and after sales service:

We have educated our employees very thoroughly in our new dental equipment in order for them to handle any questions in connection with the handling of the instruments or any trouble that might occur with your units. We know that sending a unit in for repair is a hassle, therefore, we will try to solve as many queries as possible over the phone via first-line support in customer service or via our technical department.

Online help and education:

We work continuously on developing photos and video clips, everything to make your downtime as insignificant as possible and to ease your daily routines with the units.

KRUUSE BUILD-TO-FIT GIVE YOU:

Freedom

Flexibility

Individual choices

Environmentally friendly

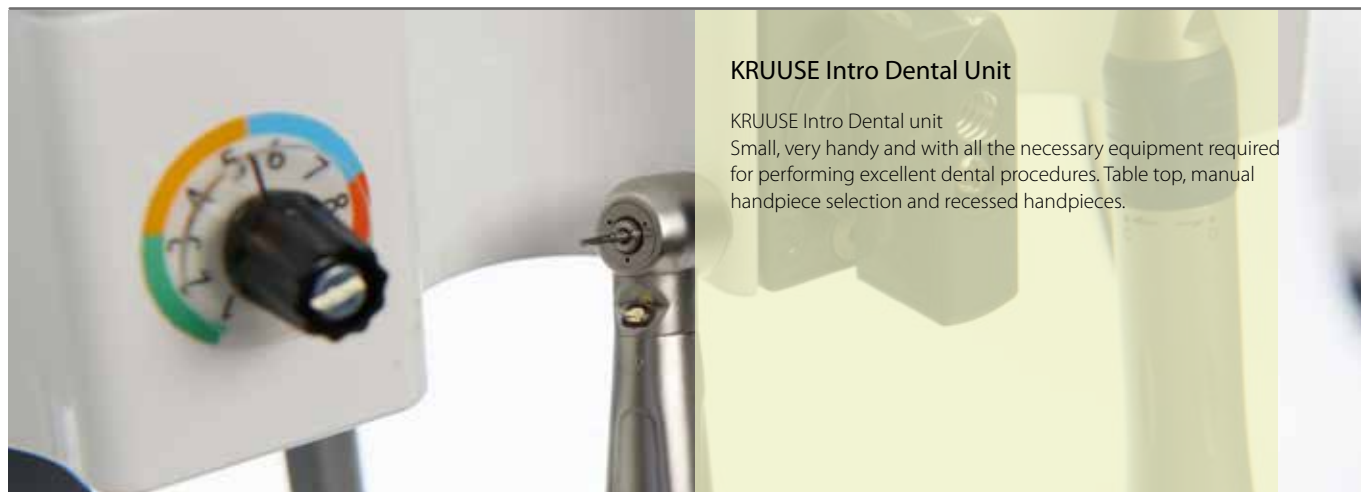

Innovation

Perfect fit

Solid foundation

KRUUSE Intro Dental Unit

KRUUSE Intro Dental Unit

KRUUSE Intro Dental unit
Small, very handy and with all the necessary equipment required
for performing excellent dental procedures. Table top, manual
handpiece selection and recessed handpieces.

KRUUSE Intro Dental Unit

Cat. No

Almost everybody working with dental units knows the situation of, by accident, bumping into the handpieces causing injuries or other damages. With our unique recessed handpieces you reduce the risk of injuries from the burrs and scaler and bending/breakage of the syringe. On the economical side, you reduce renewal of the equipment or downtime if the burrs or handpieces break during the accident. We are, with this feature, well-prepared and ahead of future regulatory demands for protection against cuts and cross-contamination.

Flat tabletop manufactured in metal and painted, so they are resistant to water and dirt. Potentiometer for controlling the fluctuations of the scaler tip.

Easy manual handpiece selection

If a tube needs changing; tubes and outlets are easily recognizable. The changeable tubes are transparent, so it is possible to see a potential clot inside the tube. The orange tubes signify air and the clear ones water. The outlets are marked with HS for High-Speed, LS for Low-Speed etc.

Dust, hair and other unwanted debris will inevitably get stuck on the unit, tubes and handpieces, when they are not in use. Therefore, a cover is a good and efficient way to protect the unit.

Exclusive design and additional colour options on units:
Vibrant Pink, Innovative Orange, Passion Red, Soft Blue, Pulp Lime Green, Rock Grey, Ebony Black, Italian White, so you can match the colours of your practice, and your clients experience a consistency throughout their visit.

KRUUSE Trio Dental Unit

KRUUSE Trio Dental Unit

Nicely designed unit with automatic handpiece selection. The handpieces are recessed for minimum risk of injury. Attachable instrument shelf.

Features and Benefits

Cat. No

Almost everybody working with dental units knows the situation of, by accident, bumping into the handpieces causing injuries or other damages. With our unique recessed handpieces you reduce the risk of injuries from the burrs and scaler and bending/breakage of the syringe. On the economical side, you reduce renewal of the equipment or downtime if the burrs or handpieces break during the accident. We are, with this feature, well-prepared and ahead of future regulatory demands for protection against cuts and cross-contamination.

Automatic handpiece selection

User-friendly control panel for water adjustment, bottle selection and potentiometre for controlling the fluctuations of the scaler tip.

Manufactured in metal and painted, so they are resistant to water and dirt. Attachable instrument shelf. The unit has small but unique features, such as the small holes for paste and instruments. This gives you control when preparing a procedure.

Slotted indexed tube prevents complete pull-out unless the bolt is totally removed from the slot.

KRUUSE Quattro Dental Unit

| 32

KRUUSE Quattro Dental Unit

KRUUSE Quattro Dental Unit

Top of the range dental unit, including suction feature.
Recessed handpieces to minimise risk of injury.
Attachable instrument shelf.

Features and Benefits

Cat. No

The powerful suction is controlled by hand, so you only need one foot pedal, i.e. fewer cords and less mess on the floor and less to clean.

Two-bottle system with water filter on the straw.

Protected compressor. The compressor is protected by a cover, which provides a silent working environment and protects against dust and hair. The compressor is oil-free, which means no oil contamination off the air supply and less maintenance. There is an easily accessible water tap, to drain the air tank on a regular basis.

All our units have, as a standard, a three-way air, water and mist 360° syringe attached by screw, so there are no weak points or bending of the syringe by accident. The tip is autoclavable.

The wheels are important on a mobile unit. These wheels run very smoothly, which makes the unit extremely mobile. The two front wheels can be locked, when the unit is in position.

KRUUSE High-Speed Handpiece with LED

Cat. No

This KRUUSE handpiece gives you full visibility of the oral cavity with air-driven LED light.

- KRUUSE High-Speed handpiece has automatically generated LED light run by the air in the unit
- Runs 350,000 rpm maximum with 2.8-3 bar for optimal pressure
- Push-button for easy burr handling
- Tripple spray for better spray and cooling
- The LED light gives a natural colour in the mouth. Power 30,000 LUX
- Light temperature 5000 K
- Fully autoclavable at 135°C
- Can be used on all other air-driven units with 4-hole Midwest coupler
- 1-year warranty of complete handpiece

KRUUSE high-speed handpiece with LED

282460

NSK Pana-Max 2, High-Speed Handpiece, Non Optic

Cat. No

If you work with sufficient external light source, you can work with this High-Speed handpiece without LED light.

- Runs 350,000 rpm maximum with 2.8-3 bar for optimal pressure
- Push-button for easy burr handling
- Tripple spray for better spray and cooling
- Fully autoclavable at 135°C
- Can be used on all other air-driven units with 4-hole Midwest coupler
- 1-year warranty of complete handpiece

282461

How to Handle Burrs in Turbine Heads

1. Place burr in bottom of turbine head with no pressure
2. Push the button hard and then press the burr into place in the turbine
3. Release and you are ready to go

NSK Low-Speed Instruments

Cat. No

Working with Low-Speed procedures, the motor is a really important piece of equipment. We have chosen this Low-Speed motor to give the vet the most unsurpassed features to work with. Approximately 25% shorter and 20% lighter compared to many other micromotors for perfect balance.

- Reducing stress and fatigue during procedures
- Runs 25,000 rpm maximum at 2-2.5 bar for optimal workout
- Possible forward and reverse rotation and manual speed control
- Fully autoclavable at 135°C and thermo disinfection in machine by 90°C
- Can be used on all other air-driven units with 4-holes Midwest coupler
- 1-year warranty

NSK Straight Nose Cones

Cat. No

This series of straight nose handpieces has special ergonomic and burr mounting features. The Twist Chuck lock function is a blue triangular silicone burr locking ring, which provides ergonomically correct and excellent grip, eases the finger setup and eliminates fatigue. At the same time, it releases and secures burr mounting with a single twist of the locking ring.

- Reducing stress and fatigue during procedures
- Fully autoclavable at 135°C and thermo disinfection in machine by 90°C
- Can be used on all air-driven micromotors
- For surgical burrs (ø 2.35 mm)
- 1-year warranty

NSK Contra Angle 4:1

Cat. No

Using a contra angle, compared to a straight nose cone, gives the vet the possibility of turning and locking the angle head to reach difficult areas of the mouth.

- Reduces polishing from 40,000 to 10,000 rpm
- To be used with contra angle head
- The contra angle and heads are fully autoclavable at 135°C
- Can be used on all air-driven micromotors
- 1-year warranty

Polishing

Cat. No

The first and only ergonomically designed prophylaxis angle with a 90° reciprocating "back and forth" rotating motion that provides continuous contact and pressure on the surface of the tooth without catching muzzle hair or whiskers.

This patented oscillating motion:

- Eliminates splatter of prophylaxis paste
- Avoids cross-contamination
- Eliminates frictional heat, making it friendlier on the surface of the tooth while protecting enamel

282378

Burrs

Kruuse has several kinds of burrs and they all have FG (Friction Grip Shank) with a rounded end that fits all standard high-speed handpieces.

FG Friction Grip Shank

Rounded end and fits all standard high-speed handpieces.

HP Long Straight Shank

Has a longer shank and is mainly used for trimming molars of rabbits and rodents. Fits into a 1:1 Low-Speed straight nose cone. HP burrs also work in thick bone for surgical, orthopaedic and endodontic use.

44.5 mm long

Burr heads are formed according to the kind of job they are to perform, where round and cross-cut taper fissure burrs are the most common.

Round burrs -To be used for caries excavation, cavity preparation, root canal access and osseous surgery. The smaller the number, the smaller the head.

Cross-Cut Taper Fissure burrs are used for sectioning multi-rooted teeth and reducing crown height.

Actual Size 44.5 mm
HP Burr

Actual Size 19 mm
FG Cross-Cut Taper Fissure Burr

Actual Size 16 mm
FG Round Burr

KRUUSE recommends disposing of dental burrs after each use or autoclaving. If multiple use by autoclaving is applicable, please be aware that wear and tear of the burr may result in more pressure on the tooth and pronounced wear and tear of the handpieces, which can shorten their lifespan.

Burrs

Cat. No

Round burrs -To be used for caries excavation, cavity preparation, root canal access and osseous surgery

Burr holder HP burrs, 12 holes, excl. burrs

282553

Piezo Scaling

Piezo Scaling

Many vets prefer the ultrasonic Piezo scaling technique because of the linear motion in a longitudinal plane, low heat generation and less water requirement. Some water is of course essential to make sufficient irrigation for removal of debris and to cool the occurring frictional heat from the scaling.

The vibration from a Piezo scaler is generated from a series of ceramic discs or quartz plates in the handpiece. The motion range from 25-50,000 cycles/second. The Piezo linear motion moves the tip back and forth in a shaving motion instead of a circular or elliptical motion like a magnetostrictive tip. This means that the scaling procedure becomes more acceptable, as it is to be used as a regular hand instrument, when the lateral side of the tip is against the tooth. It also allows the use of bladed curette tips and tips with lateral edges that can engage biofilm and calculus differently than a smooth, round tip.

Piezo scalers work with small screw-in scaler tips and need to be mounted with a wrench.

It is very important to keep an eye on the wear of the tip in order for it to perform efficiently and fast. If the tip is worn, it reduces scaler performance. Our NSK scaler is equipped with a guide, which shows, very clearly, whether the tip is worn and needs to be changed.

NSK Varios 170 Scaler

Cat. No

The handpiece of the scaler is well-balanced, light-weight and slim, which gives you a good overview of the patient's mouth. The Piezo scaler has a frequency of 28-32 kHz. The handpiece is attachable and autoclavable.

NSK new technology, iPiezo engine ensures stable power output by automatically adjusting to the optimum vibration frequency depending on loading status, which offers you more effective treatment in all applications with a wide range of tips.

The iPiezo controller offers exactly the right performance depending on the teeth's surface and it guarantees a stable frequency output even during removal of heavy cases of tartar.

The scaler comes with 3 tips installed in the wrench, easily mounted on the scaler. G 4 (282494), G 6 (282496), G 8 (282498). The tips can be autoclaved in the wrenches, so they are ready for use instantly.

The handpiece is always controlled while not in use.

NSK Varios 170 Scaler, built-in unit	282469
NSK Varios 170 Scaler, handpiece	282470

KRUUSE ART-SP2 Piezo Scaler and Micromotor

Cat. No

Combined Piezo scaler and micromotor unit.

This is a superbly combined Piezo unit for most veterinary practices, who want an easy-to-use scaler and polisher in one unit. The front is very easy-to-use with a button to switch between scaling and polishing mode. The scaler is a Satelec scaler, which can be autoclaved at 135°C. The micromotor rotates up to 30,000 RPM. Additional accessories can be purchased to fit into the micromotor such as small burs via a contra angle, large burs directly into the straight nose cone and also diamond disc cutting wheels.

The ART-SP2 Satelec Piezo scaler and micromotor is supplied with:

- 271400, 271401, 271402 3 Bonart scaling tips, No 1, 2 and 3
- 390536 Bonart Tip wrench
- 271190 Pump, 5 l water bottle
- 271103 Foot pedal control, on and off
- Micromotor E fitting and holder
- 282464 Straight nose cone 1:1
- 282485 KRUUSE Starter Set for polishing (KRUUSE Oscillating Prophy Angles, Polishing Paste, Polishing Cups)

KRUUSE ART-SP2 Piezo scaler and micromotor

KRUUSE ART-P3II Piezo Electric Ultrasonic Scaler

Cat. No

The P3II model features an upgraded "AGC" Auto Gain Control which automatically adjusts the power when in use. The unit only has two controls for power and water. The LCD display shows the selected power setting and the recommended scaler tip. The Satelec scaler can be autoclaved at 135°C.

The ART-P3 Satelec Piezo scaler II is supplied with:

- 271400, 271401, 271402 3 Bonart scaling tips, No 1, 2 and 3
- 390536 Bonart Tip wrench
- 271190 Pump, 5 l water bottle
- 271103 Foot pedal control, on and off

KRUUSE ART-P3II Piezo electric ultrasonic scaler

271391

Cavitron or Magneto-Restrictive Scaling

Cat. No

This type of scaler has the long scaler insert with bonded leaves of metal. When subjected to a strong electromagnetic force, the leaves or reeds vibrate very fast, 25,000 cycles/sec, and cause the tip to move in the scaling mode. A lot of heat is generated and consequently, water-cooling is very important. See page 40 for Piezo scaling principle.

KRUUSE ART-SP1 Combined Ultrasonic Scaler and Micromotor Unit

This is a practical solution for most veterinary practices, who want an easy-to-use scaler and polisher in one unit. The front is very easy to use with a button to switch between scaling and polishing mode. The scaler is magneto - restrictive (cavitron), and is a very reliable model. The micromotor rotates up to 30,000 rpm.

Additional accessories can be purchased to fit into the micromotor such as small burs via a contra angle, large burs directly into the straight nose cone and also diamond disc cutting wheels.

The ART-SP1 Ultrasonic scaler and micromotor is supplied with:

- 271116 25kHz scaler tip, fine
- 271117 25kHz scaler tip, medium tip
- 271190 Pump, 5 l water bottle
- 271103 Foot pedal control, on and off
- 282464 Straight nose cone 1:1
- Micro motor E fitting and holder
- 282485 KRUUSE Starter Set for polishing (KRUUSE Oscillating Prophy Angles, Polishing Paste, Polishing Cups)

KRUUSE ART-SP1 combined ultrasonic scaler/polisher

271392

KRUUSE ART-M3 II Ultrasonic scaler

Cat. No

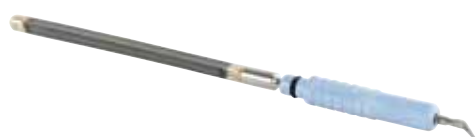

Water, supplied from a pump of 5 l water bottle, is required to cool the handpiece and scaler tip and to wash away the debris. Only two controls for power and water. The LCD display shows scaling- endo and perio mode. The M3II model features an upgraded "AGC" Auto Gain Control which automatically adjusts the power when in use. The LCD display shows the selected power setting and the recommended scaler tip.

The ART-M3 II ultrasonic scaler is supplied with:

- 271116 25kHz scaler tip, fine
- 271117 25kHz scaler tip, medium tip
- 271190 Pump, 5 l water bottle
- 271103 Foot pedal control, on and off

282488

NSK PANA Spray Plus Instrument Oil	Cat. No
This oil is based on ester oil, which protects the surface from wear and tear. Comes with a nozzle for precise spray.	
Small oil drip bottle for precise application.	
NSK PANA Spray Plus, instrument oil with nozzle, 480 ml	282486
NSK oil bottle 5 ml	282488

It is advisable to apply oil every time before autoclaving any handpiece or air-driven motor.

KRUUSE Dental Formula, 250 ml	Cat. No
KRUUSE Dental Formula, 250 ml can be beneficial to use during the use of the High-Speed handpiece. It reduces the burr cutting time, cleans the tubes of the unit and the mouth of the patient and also disguises bad odours.	
Ingredients: Water, Glycerin, Alcohol, Isopropyl alcohol, Chlorhexidine diglyconate, Polysorbate 80, Aroma.	
Right mixture: 1:3. One bottle of KRUUSE Dental Formula, 250 ml with 750 ml demineralized sterile-filtered water makes 1 liter of solution. Empty any remainings of the solution before adding new mixture to ensure the right mixing ratio.	
When mixed, use within 1 month.	
KRUUSE Dental Formula, 250 ml	282474

PrevaVet DC Dental X-Ray

Cat. No

PrevaVet DC is designed specifically to provide exceptional digital images. It begins with the smallest possible focal spot at just 0.4 mm - a feature that immediately provides sharper, more detailed images whether you are using the latest sensor technology or standard film. Add adjustable mA, kV and time settings and you have the perfect combination for today's digital imaging environment, PrevaVet DC. PrevaVet DC's unique arm design moves smoothly and positions easily without drift or sag.

All the features you want for diagnostic image excellence:

- Unique sensor selection feature
- 30 pre-programmed techniques
- Drift-free, secure and smooth gliding arm
- Unique tube head handle
- Specifically designed to meet the needs of digital sensors
- Adjustable kVp (60, 65 and 70)
- Adjustable mA (4, 5, 6, 7)
- Adjustable time (10ms – 2 seconds)
- 0.4 mm focal spot - the smallest available
- Easy to understand icons

VetPro® VDX

Cat. No

Advanced digital dental imaging made easy.
Capture diagnostic digital images with extraordinary detail and clarity.

- Cable is Kevlar® reinforced for exceptional durability
- Hermetically sealed, waterproof design means no problems during routine cleaning
- Advanced CMOS technology delivers outstanding image quality
- High-Speed USB connection captures images 37% faster
- Rounded corners mean easier positioning in tight spaces for better capture of roots
- Factory repair service

VetPro® VDX delivers fast, clean images for diagnosis and client education. Superior soft-tissue visualization; crown and root definition and low noise produce the quality digital images you need in your practice.

The durable design of the new VetPro® VDX sensor takes the worry out of digital image capture. Imaging Software

Loupes, Headlights and other helpful Products

HEINE loupe glasses, attachable loupe lights, LED headlights and laryngeal mirrors with light are all very useful in the daily work of a veterinary dentist. They are all high quality products that provide you with outstanding visibility and thereby a better workflow.

UB Cam Videoscope is an easy-to-use tool to involve the client or to document procedures by taking still photos or video sequences.

HEINE HR® Binocular Loupes

Cat. No

HR Technology for an even bigger Field of View

HR Binocular Loupes with 2.5 x magnification are specially recommended for dental surgery and endodontics.

The Brightest Image

Exclusive coating technology reduces light reflection to 0.3 %, providing the brightest image of any comparable loupe.

The Crispest Image with Colour Correction

State-of-the-art HEINE optics with achromatic lenses provide a standard for image clarity, crispness and colour compared with conventional Galilean loupes.

Super-Wide, Super-Deep Field of View

HR (High Resolution) optical technology provides a super-wide, fully-useable, distortion-free field of view (up to 250 mm) and the greatest depth of field (up to 290 mm) to eliminate eye strain even over extended periods of use.

Dust and Water Resistant

All HR loupes are dust- and water-resistant to ensure ease of cleaning /disinfection, and years of trouble-free use.

Flexibility for Precise Adjustment

HEINE binocular loupes have independently adjustable optics left and right to select the exact inter-pupillary distance.

Super Light

HR optics weigh only 42 grams for user-comfort even over extended periods.

HEINE S-Frame®

Innovative spectacle frame for HR 2.5 x binocular loupes. Can be customized to fit any shape of head and face.

Set of HEINE Binocular Loupes Contents:

Optics, S-Frame with i-View loupe mount for HR 2.5 x loupes detachable protective lenses, 2 sterilisable swivel levers, retaining cord, cleaning fluid, carrying case.

340 mm working distance focus depth 28.5 cm - 39.5 cm (1)

420 mm working distance focus depth 33 cm - 49 cm (1)

520 mm working distance focus depth 39 cm - 65 cm (1)

HEINE LED LoupeLight®

Cat. No

Compact LED LoupeLight, ideal for dental use

Advanced LED Technology

White, homogenous light, ideal for all surgical and dental applications. 40,000 Lux

Coaxial Illumination

Shadow-free illumination of cavities, ideal for dental applications. Ideal co-axial viewing with all HR loupes.

Homogenous illumination of the whole Field of View.

The light spot is ideal for HR loupe systems. Approximately 81 mm illumination field at 420 mm, approx. 95 mm at 500 mm working distance.

Compact, lightweight (24 g)

Ensures perfect comfort.

Aluminium housing

Robust, durable.

Waterproof design

Easy to clean.

Fully-portable with mPack LL

Autonomy at least 17 hours.

Individual adjustment of the angle of view

The right angle for every situation.

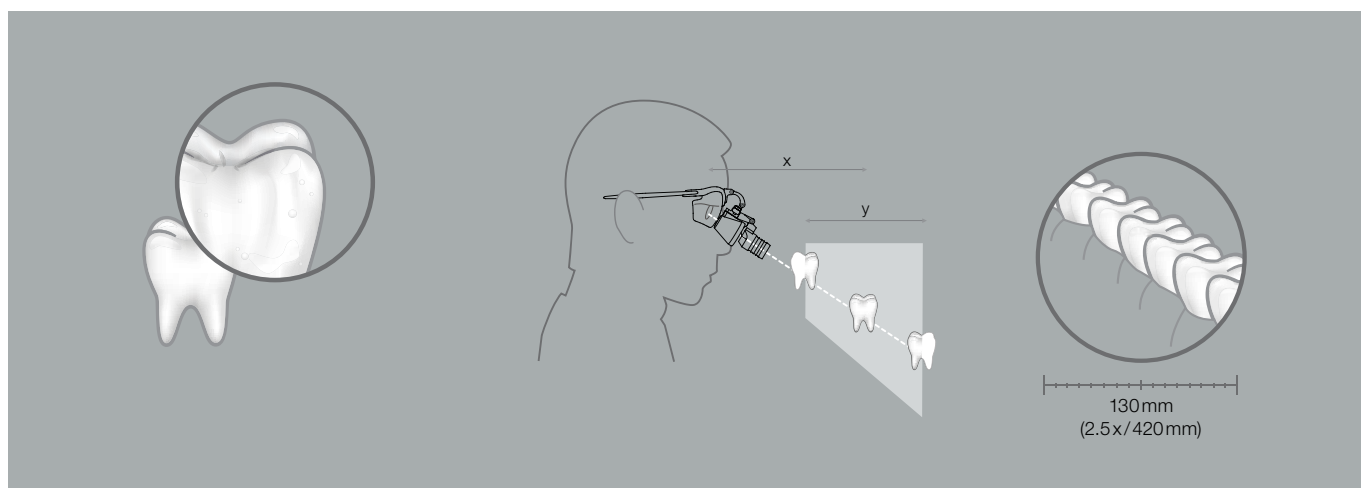

Optional yellow filter reduces blue light

Avoids premature hardening of composites.

UB Cam Pro Videoscope

Cat. No

- Small and handy
- Easy to use
- Excellent image quality
- Live recording as well as still images
- Easy to display pictures (eg before / after treatment) to the client
- Easy way of making photo documentation

UB Videoscope Cam is a powerful tool to visualize the investigations to the client, especially in areas with difficult accessibility e.g. when examining rodents, rabbits etc. UB CAM allows you to store images in high-resolution for the patient records or for referrals. This makes UB Cam an incredibly useful tool as a camera during oral cavity examinations and dental treatment.

A truly useful tool for use in the veterinary clinic

Technical Specifications

- Connects to PC / laptop via USB 2.0 port
- Minimum system requirements: Windows XP
- Sensor type 1 / 4, 5"VGA CMOS
- Sensor resolution: 660H x 507V, 334 620 pixels
- Sensor pixel size: 3.6 microns x 3.6 microns

Diagnostic Dental Equipment

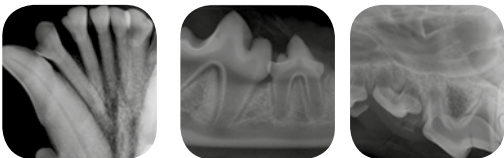

FireCR Dental Reader

Cat. No

- The Dental CR solution for veterinary professionals
- This full-featured FireCR dental reader from KRUUSE delivers high-quality dental images at an affordable price for the veterinary profession
- Compact & affordable
- The FireCR dental reader is compact and affordable, helping to increase patient throughput and improve the productivity of your practice or clinic. With its small footprint, the reader fits seamlessly into even the most space-challenged veterinary offices and examination rooms.
- Simple, streamlined operation
- The FireCR dental reader combines an elegant design with a powerful yet easy-to-use system that gets the job done day in and day out.

The FireCR dental CR is automated, magnetized feeding tray offers “push and go” functionality, making it simple to operate for busy technicians. The reader is DICOM 3.0 compatible and uses a full range of reusable bitewing and intra-oral imaging plates that are easier and faster to position than intra-oral digital sensors. Importantly, a true size 4c imaging plate is available, so technicians do not have to use software stitching to combine images from two-sized 3 plates-a cumbersome and inefficient process.

Included in the FireCR Dental Package

- 4 x FireCR Dental, Size 2 Imaging Plate Kit
- 1 x FireCR Dental, Size 4c Imaging Plate Kit
- 1 x Hygienic Bags Size 2, 100 pcs
- 1 x Hygienic Bags Size 4c, 100 pcs
- IP Storage Box
- USB 2.0 Interface Cable
- Ethernet Cable
- Power Cable
- QuantorDentVet Imaging Software

NOMAD pro 2 Veterinary Handheld X-ray System

Cat. No

The NOMAD Pro 2 Veterinary Handheld X-ray System will change - and improve - the way you practice veterinary medicine. The speed and convenience, will give added value to any clinic doing dental exams.

- **Portable** - Weighs just 2.5 kg.
- **Cordless** - design goes anywhere, in or out of the office
- **Extends Your Practice** - Excellent for dental, small animal, exotics, equine
- **Economical** - No installation, renovation, or re-wiring
- **Easy to Use** - Easy to get difficult angles for faster diagnoses. Hundreds of first-class diagnostic images from one convenient charge
- **Versatile** - Optimized for veterinary dental - can also be used for limbs and extremities. Sharp, clear images with film or digital
- **Optimize workflow** treat more patients faster and with great accuracy on sensor, or phosphor plate
- **Patient Friendly** - Quick diagnoses means less time under anesthesia

The NOMAD Pro Veterinary delivers a precise and consistent examination, with a focal spot of 0.4 mm. It produces sharper and more defined images. When using film or digital sensors.

Included in NOMAD Pro 2 Veterinary Handheld X-ray System

283330

- Handheld generator with voltage of 60 kV
- 2 batteries and a charger. Battery is lithium polymer, 22.2V, 1.25 Ahr.
- Backscatter shield
- Getting started
- Guide operator training CD (includes operator manual)
- One year limited warranty

*Not available in all countries, check it with your local KRUUSE dealer also for options on extra equipment like, travelcase and tabletop stand.
